

Orange Bumper-Mounted Transponders

Oversized and overweight vehicles are required to have an EXpressToll account to drive on E-470. Trucks that are 45-feet or longer in length, 13-feet or more in height, and 36,000 pounds in weight or heavier, will be required to have an orange bumper-mounted transponder on the front of their vehicle. The new transponders will be available at the EXpressToll Customer Service Center by mid-January 2009. Customers whose vehicles meet this requirement may obtain an orange bumper-mounted transponder from the EXpressToll Customer Service Center located at 22470 E. 6th Parkway, Aurora, CO 80018, or by calling 303-537-3470, option 1. Existing customers in this category must switch their current transponder by visiting or calling the service center.
