

# **E-470 Road Widening Project Update**

***July 2020***

## ***E-470 Bridges***

In July, crews continued to work on the railings and approach slabs for the E-470 bridges over I-70. Next steps for these bridges include painting and waterproofing the deck surfaces. Crews will also move on to waterproofing the bridge decks, having just completed painting the new surfaces.

## ***New E-470 Ramps***

Grading and underground work took place in July for the new on and off ramps for E-470 at Quincy Ave. and Gun Club Rd. Crews will move on to the ramp subgrade and asphalt paving in August, with the aim to have these ramps open by late fall.

## ***Asphalt Paving***

In July crews completed final asphalt surfacing from 6th Pkwy./Stephen D. Hogan Pkwy. to Quincy Ave. on southbound E-470. Lane closures took place on the roadway to help facilitate this work, and crews will move onto surfacing the third lane expansion on northbound E-470 from Quincy to 6th Pkwy./Stephen D. Hogan Pkwy.

## ***High Plains Trail***

Significant progress was made in July on the High Plains Trail as crews completed paving four out of six miles of the 10-foot wide trail. This work will be followed by concrete pours to help tie together long stretches of paving that have already been set.

## **Upcoming Work**

### ***Full Closure of SB E-470 at Smith Rd***

In August, crews will begin pile driving for the E-470 bridges over Smith Rd. and the Union Pacific Railroad. The closure of southbound E-470 at Smith Rd. on August 2 and 9 will ensure crews can safely work in this area.

### ***I-70 Bridge Work***

In August traffic will be shifted on the E-470 bridges over I-70 as crews work to replace the existing expansion joints on the roadway. This work will take place during the weekends to minimize disruptions, and those traveling through the area should expect some delays.
